

2500 Mile Monkey-gram

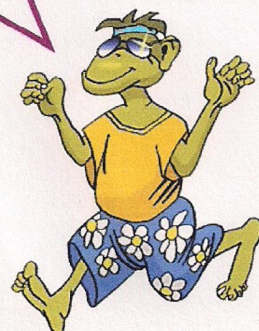

Hey Guys, remember when my friend Gene Baasen went over 2000 walking miles on April 12, 2010

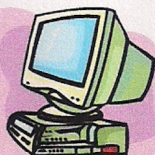

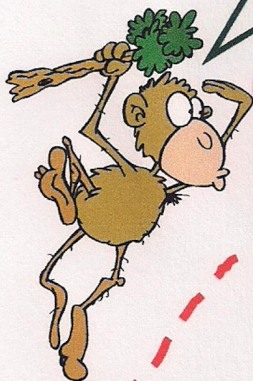

Yea, that was the number of miles he had walked since he quit smoking in the middle of 2007

Gene thinks he is the head monkey, but I actually am.

I snuck a looked at his computer records and on July 16, 2010, he went over 2500 miles

It seems to me he would get to where he is going faster if he drove

I wonder if he ever gets hungry. I would.

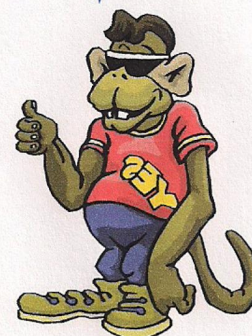

I should teach him to skateboard

I'm proud of him

He gets thumbs up from me

I would rather hang around and sleep. I don't get tired doing that
